Third Party Respondents

FOURTH AFFIDAVIT OF ANTHONY J. MARTIN

I, Anthony J. Martin, having a professional residence in the City of Toronto, in the Province of Ontario, Canada, SOLEMNLY AFFIRM THAT:

1. I am an investigator in the Corporate Security department of BCE Inc. (“**BCE**”), the parent of the Plaintiff Bell Media Inc. (“**Bell Media**”).

2. As an investigator, I am a member of a team in BCE's Corporate Security department that is specifically responsible for combating television content piracy. I joined BCE's anti-piracy team on March 13, 2017.
3. My experience and credentials in investigating instances of television content piracy are set out in the first affidavit I have sworn in this proceeding, dated July 15, 2019.
4. My first affidavit was filed on July 18, 2019, in the context of motions by the Plaintiffs for an interim and interlocutory injunction against the Defendants, which I understand were respectively presented before Mr. Justice LeBlanc of the Federal Court on July 25, 2019, and Madame Justice Kane of the Federal Court on August 7, 2019.
5. I have also sworn a second affidavit in this proceeding, dated July 29, 2019, in the context of a motion by the Plaintiffs for an interlocutory injunction against the Third Party Respondents, a group of Internet service providers ("ISPs") who provide residential Internet services to the majority of Canadian Internet users. I understand that this motion was granted by Order of Mr. Justice Gleeson dated November 15, 2019 (the "**Order**").
6. I also signed a third affidavit in this proceeding, dated September 3, 2019.
7. I have personal knowledge of all the facts stated in this Affidavit, unless indicated otherwise.
8. To avoid confusion, the exhibits to the present affidavit are numbered sequentially starting from the last exhibit of my third affidavit (Exhibit AM-43).

I. CONTEXT: THE GOLDTV SERVICES AND THE ORDER

A. The GoldTV Services

9. The present affidavit pertains to two subscription-based Internet streaming services that distribute unauthorized live broadcasts of television stations and on-demand television and motion picture content, both operating under the name "GoldTV". As of the issuance of the Order, one of these services operated from the domains goldtv.biz and edge.tm (the "**GoldTV.biz Service**") and the other had previously operated from the domains

www.goldtv.ca, www.goldtv.info and www.hostcenter.ca, which at the time of issuance of the Order were – and still appear to be – inactive or dormant (the “**GoldTV.ca Service**”, together, the “**GoldTV Services**”).

10. As described in detail in my first affidavit, the GoldTV Services provide unauthorized, immediate and unlimited access to a vast amount of live television and video-on-demand (“**VOD**”) content through user-friendly interfaces, including television stations operated by the Plaintiffs and television content for which the copyright is owned by the Plaintiffs.
11. Various aspects of the GoldTV Services, including their technical aspects, their business models, their popularity, the step-by-step process by which a user can access live and VOD content, the user-friendly nature of these services, and the television content that can be accessed through these services, are described in detail at paragraphs 44 to 86 of my first affidavit.

B. The Order and its Schedule 1

12. I understand that pursuant to the Order, the Third Party Respondents are ordered to block or attempt to block access to a number of domains, subdomains and/or IP addresses associated with the GoldTV Services, listed at Schedule 1 to the Order.
13. I also understand that the Order contains a mechanism to remove domains, subdomains and IP addresses from Schedule 1 in certain circumstances, and another mechanism to supplement Schedule 1 with additional domains, subdomains and/or IP addresses that are identified as having for sole or predominant purpose to enable or facilitate access to the GoldTV Services. The present affidavit is filed in the context of that second mechanism.
14. I also understand that Schedule 1 to the Order was last updated on November 17, 2019, to remove one domain and certain IP addresses previously associated with the GoldTV.biz Service from Schedule 1 as it was initially appended to the Order. A copy of Schedule 1 as updated on November 17, 2019, is attached to my affidavit as **Exhibit AM-44**.

II. THE GOLDTV.BIZ SERVICE

A. Domains, sub-domains and IP addresses for the GoldTV.biz Service

The beex.me domain and associated subdomains

15. Following the issuance of the Order, on or around November 22, 2019, I noticed that I could no longer access the GoldTV.biz service through the subdomain edge.tm, listed in Exhibit AM-44.
16. On November 22, 2019, I contacted the reseller from which I had purchased a subscription to the GoldTV.biz Service to inquire as to why I could no longer access the service. Later that day, the reseller asked me through which portal (i.e. subdomain) I was attempting to connect to the GoldTV.biz service and specified that I should use the portal gold.myiptyplanet.com instead. A copy of my communication with the reseller, from which were redacted the alias that I used and our respective e-mail addresses to maintain my investigative position with the reseller, is attached to my affidavit as **Exhibit AM-45**.
17. Later on November 22, 2019, I successfully accessed the GoldTV.biz Service through the portal gold.myiptyplanet.com using a set-top box in the same manner as described in my first affidavit. Notably, the general appearance, channel numbers and content available through the portal gold.myiptyplanet.com was the same as for the previous portals associated with the GoldTV.biz Service that I had previously tested.
18. During these tests, I used a specialized tool named Wireshark, which I have used and found to be reliable in the past in similar contexts, in order to identify to which Internet address my set-top box was connected when I accessed the portal gold.myiptyplanet.com. As it appears from a screen capture of the Wireshark interface taken during that test, attached to my affidavit as **Exhibit AM-46**, connecting to the portal gold.myiptyplanet.com in fact connected my set-top box to the subdomain portal.beex.me. Similarly, entering the address gold.myiptyplanet.com into a standard web browser automatically redirects a user to the address portal.beex.me/stalker_portal/c. One of the new portals for the GoldTV.biz Service is therefore the subdomain portal.beex.me, on the domain beex.me.

19. I then tested accessing the GoldTV.biz Service using the same subdomains as for the previous edge.tm domain that appear on Exhibit AM-44, but on the beex.me domain, i.e. portal.beex.me instead of portal.edge.tm; dyn.beex.me instead of dyn.edge.tm; and 256.beex.me instead of 256.edge.tm. As a result of these tests, I could access the GoldTV.biz Service through the subdomains portal.beex.me and 256.beex.me.
20. In light of the above, the following domains and subdomains have as their sole or predominant purpose to enable or facilitate access to the GoldTV.biz Service:
- a) **gold.myiptvplanet.com**: which automatically redirects to a portal for the GoldTV.biz service.
 - b) **beex.me**: the main domain for a GoldTV.biz portal, which is identified with the following subdomains, as it appears for the domain information for beex.me, attached to my affidavit as **Exhibit AM-47**:
 - (i) **portal.beex.me** and **256.beex.me** which, as described above, allow subscribers to connect to the GoldTV.biz Service to access its content.
 - (ii) **panel.beex.me**, which is linked to the same IP address as panel.edge.tm, the “control panel” used by operators and resellers of the GoldTV.biz Service to manage user accounts and subscriptions.
- I am not aware of any other subdomain for the domain beex.me, including any subdomain that would be associated with any purpose or service other than the operation of the GoldTV.biz Service.
21. I note that ownership of the domains myiptvplanet.com and beex.me is obfuscated so as to be rendered anonymous, as it appears from the WHOIS record for these domains, attached to my affidavit in a bundle as **Exhibit AM-48**.
22. I propose to supplement Schedule 1 to the Order to include the domains and subdomains listed in paragraph 20 above.

The pcvhd.net domain and associated subdomains

23. Also on November 22, 2019, my colleague Yves Rémillard informed me that his reseller for the GoldTV.biz Service had contacted him with new information on the domains and subdomains associated with the GoldTV.biz Service. More particularly, Mr. Rémillard specified that the GoldTV.biz Service portal was associated with the domain live4k.online, and that the reseller panel was associated with the subdomain panel.beex.me (i.e. the same I had identified and mention at paragraph 20(b)(ii) above).
24. On November 28, 2019, I successfully accessed the GoldTV.biz Service through the portal live4k.online using a set-top box in the same manner as described in my first affidavit. Notably, the general appearance, channel numbers and content available through the portal live4k.online was the same as for the other portals associated with the GoldTV.biz Service that I had previously tested.
25. Furthermore, similarly to how the portal gold.myiptyplanet.com connected to the subdomain portal.beex.me, the domain live4k.online connects to the subdomain tulip.pcvhd.net, as it appears from a screen capture of the Wireshark interface taken during my testing, attached to my affidavit as **Exhibit AM-49**. Likewise, entering the address live4k.online into a standard web browser automatically redirects a user to the address tulip.pcvhd.net/stalker_portal/c. One of the new portals for the GoldTV.biz Service is therefore the subdomain tulip.pcvhd.net, on the domain pcvhd.net.
26. As further described in the following paragraph, in addition to tulip.pcvhd.net, the domain pcvhd.net is also associated with the subdomains tv-tulip.pcvhd.net, hitron.pcvhd.net and tv-hitron.pcvhd.net. I tested accessing the GoldTV.biz Service using the subdomains tulip.pcvhd.net, tv-tulip.pcvhd.net, hitron.pcvhd.net and tv-hitron.pcvhd.net and, as a result of these tests, I could access the GoldTV.biz Service with the same experience as described above and in my previous affidavits.

27. In light of the above, the following domains and subdomains have as their sole or predominant purpose to enable or facilitate access to the GoldTV.biz Service:

a) **live4k.online**: which automatically redirects to a portal for the GoldTV.biz service.

b) **pctvhd.net**: the main domain for a GoldTV.biz portal, which is identified with the following subdomains, as it appears from the domain information for pctvhd.net, attached to my affidavit as **Exhibit AM-50**:

(i) **tulip.pctvhd.net**, **tv-tulip.pctvhd.net**, **hitron.pctvhd.net** and **tv-hitron.pctvhd.net** which, as described above, allow subscribers to connect to the GoldTV.biz Service to access its content.

I am not aware of any other subdomain for the domain pctvhd.net, including any subdomain that would be associated with any purpose or service other than the operation of the GoldTV.biz Service.

28. I note that ownership of the domain live4k.online is obfuscated so as to be rendered anonymous, as it appears from the WHOIS record for that domain, attached to my affidavit as **Exhibit AM-51**.

29. As for the domain pctvhd.net, its WHOIS record, attached to my affidavit as **Exhibit AM-52**, indicates that it is registered to an individual named Fedor Nikolov, from an anonymous organization, located at Telmana 2, Saratov, Saratavskaya Oblast, Russia. My investigation into the operation of the GoldTV.biz Service remains ongoing but, at this time, I have no other information with regard to Mr. Nikolov, his location, and his activities.

30. I propose to supplement Schedule 1 to the Order to include the domains and subdomains listed in paragraph 27 above.

The goldtv.biz and edge.tm domains and their respective subdomains

31. Following the issuance of the Order, it appears that the operator(s) of the GoldTV.biz Service not only made new portals available on additional domains and subdomains, but also deactivated the domains goldtv.biz and edge.tm and their respective subdomains listed in Exhibit AM-44.
32. I attach to my affidavit as **Exhibit AM-53**, in a bundle, copies of DNS records for these domains and subdomains, which indicate that they are not associated with any IP address ("ResponseDNS Record not found").

III. THE GOLDTV.CA SERVICE

33. As of the date of the present affidavit, it does not appear that the domains, subdomains and IP addresses previously associated with the GoldTV.ca Service have been reactivated.

IV. CONCLUSION

34. A proposed updated Schedule 1, which reflects the above, is attached to my affidavit as **Exhibit AM-54**.

Anthony Martin

SOLEMNLY AFFIRMED BEFORE ME
at the City of Ottawa in the
Province of Ontario, Canada, this 3rd
day of December 2019.

Commissioner of Oaths

Peterdina Claire Gordon, a Commissioner, etc.,

Access to WHOIS information is provided to assist persons in determining the contents of a domain name registration record in the registry database. The data in this record is provided by The Registry Operator for informational purposes only, and accuracy is not guaranteed. This service is intended only for query-based access. You agree that you will use this data only for lawful purposes and that, under no circumstances will you use this data to (a) allow, enable, or otherwise support the transmission by e-mail, telephone, or facsimile of mass unsolicited, commercial advertising or solicitations to entities other than the data recipient's own existing customers; or (b) enable high volume, automated, electronic processes that send queries or data to the systems of Registry Operator, a Registrar, or Afilias except as reasonably necessary to register domain names or modify existing registrations. All rights reserved. Registry Operator reserves the right to modify these terms at any time. By submitting this query, you agree to abide by this policy.

The Registrar of Record identified in this output may have an RDDS service that can be queried for additional information on how to contact the Registrant, Admin, or Tech contact of the queried domain name.

ABOUT THE SUPERTOOL!

All of your MX record, DNS, blacklist and SMTP diagnostics in one integrated tool. Input a **domain name** or **IP Address** or **Host Name**. Links in the results will guide you to other relevant tools and information. And you'll have a chronological history of your results.

If you already know exactly what you want, you can force a particular test or lookup. Try some of these examples:

(e.g. "blacklist: 127.0.0.2" will do a blacklist lookup)

Command	Explanation
blacklist:	Check IP or host for reputation
smtp:	Test mail server SMTP (port 25)
mx:	DNS MX records for domain
a:	DNS A record IP address for host name
spf:	Check SPF records on a domain
txt:	Check TXT records on a domain
ptr:	DNS PTR record for host name
cname:	DNS canonical host name to IP address
whois:	Get domain registration information
arin:	Get IP address block information
soa:	Get Start of Authority record for a domain
tcp:	Verify an IP Address allows tcp connections
http:	Verify a URL allows http connections
https:	Verify a URL allows secure http connections
ping:	Perform a standard ICMP ping
trace:	Perform a standard ICMP trace route
dns:	Check your DNS Servers for possible problems New!

ABOUT THE SUPERTOOL!

All of your MX record, DNS, blacklist and SMTP diagnostics in one integrated tool. Input a **domain name** or **IP Address** or **Host Name**. Links in the results will guide you to other relevant tools and information. And you'll have a chronological history of your results.

If you already know exactly what you want, you can force a particular test or lookup. Try some of these examples:

(e.g. "blacklist: 127.0.0.2" will do a blacklist lookup)

Command	Explanation
blacklist:	Check IP or host for reputation
smtp:	Test mail server SMTP (port 25)
mx:	DNS MX records for domain
a:	DNS A record IP address for host name
spf:	Check SPF records on a domain
txt:	Check TXT records on a domain
ptr:	DNS PTR record for host name
cname:	DNS canonical host name to IP address
whois:	Get domain registration information
arin:	Get IP address block information
soa:	Get Start of Authority record for a domain
tcp:	Verify an IP Address allows tcp connections
http:	Verify a URL allows http connections
https:	Verify a URL allows secure http connections
ping:	Perform a standard ICMP ping
trace:	Perform a standard ICMP trace route
dns:	Check your DNS Servers for possible problems New!
